C. J. BRAREN

Quality Bread

There is a peculiar something about Barber's Bread that makes it stand out prominently in many homes in this town—it has a tastiness that causes the children and grown ups to marvel at its goodness. The answer is, Quality, and that is because the best wheats and other ingredients of the highest nutrition, combined with modern methods of baking go into every loaf. We serve quite a number of the citizens daily, and we can serve you too. Buy a loaf of our bread today and you will appreciate this. Our cakes and pastries are equally good, and prices are reasonable.

One taste is enough to convince you that it's useless to look elsewhere for its superior. Equals it may chance to have, but superiors, never. We have Ice Cream in all the most delicious flavorings packed in our freezers ready to serve by the plate, pint or gallon.
How much can you use today?

J. B. BOESE

Crop Average and Crop Yield

Addressing the Canadian Club of Regina during the week of the Provincial Exhibition, Dr. Tolmie, the Dominion minister of agriculture, laid emphasis upon the fact that, despite a steady and really large increase in acreage under cultivation in Canada during the last ten years, there had been a marked falling off in yield per acre, with the result that the farm production of the country had not grown in volume to the extent that might have been expected from the increase in acreage placed in crop.

Commenting on this disappointing result the Federal minister of agriculture said: "An increase of the number of acres in the production of wheat in Canada would mean an annual increase of over \$100,000,000, and over \$500,000,000 could be added to the wealth of the country every year if the farmers would exercise more intelligence and enterprise in their agricultural operations."

These are startling figures even in this age when we have become accustomed to reckoning things in the millions of dollars. And Dr. Tolmie was speaking by the book; the official statistics of Dominion and provincial governments bear out the assertions he made.

It is assuredly in the interest, not only of the country as a whole, but in the interest of the individual farmer that the causes of this decline in yield per acre should be ascertained and steps taken to check its further progress and to bring about a steady increase in yield. There is far more money, and infinitely larger profits, in increasing the yield per acre than in largely increasing the number of acres in crop which produce a comparatively small yield.

Dr. Tolmie suggested certain remedies. First, a large increase in yield can be obtained from the general use of good seed. Second, an intelligent rotation of crops will inevitably produce larger yields. Third, the introduction of more live stock on the farm will tend to the same much desired end.

There are other points which Dr. Tolmie did not dwell upon, but which must suggest themselves to any person journeying through the grain fields of the West and along our country roads. First and foremost there is the question of weeds. Western farmers reap huge sums of money annually in fall insurance premiums, but in the annual loss from hail is but small in comparison with the annual loss resulting from the increased yield because of weeds. Thousands of dollars are spent annually in fighting the weeds, and in Manitoba and Saskatchewan this means hundreds of thousands of dollars have been expended in the effort. And it has all been money well spent. But year after year weeds take a greater toll

than these pests without halt the extinction or effort to eradicate them and stop the loss.

In many directions government and farmers' organizations are striving to improve the condition and advance the property of the farmers, but thousands of farmers are themselves neglecting a matter little of which is in their own hands. They are growing weeds instead of wheat, oats, barley and flax. Where there is an abundant crop of weeds, there cannot be a heavy yield of grain. Sooner or later the whole of Western Canada will have to bestir itself in connection with the weed problem, and the sooner the better for all concerned, and the cheaper in the long run. Public opinion on the question is easily asleep with the result that a weed official who proceeds to fearlessly do his duty quickly makes himself a most unpopular individual.

Another difficulty to be found is the weakness of so many men to acquire new land. Most average seems to be their ambition rather than more grain. They seem to be happier with 500 acres yielding 14 bushels to the acre, or 7,000 bushels, than with 350 acres yielding 20 bushels to the acre, or a like total crop of 7,000 bushels, in which it is cheaper to plow, seed, harvest and thresh the 350 acre crop than it is the 500 acre one, not to speak of the capital tied up in the larger acreage which, in itself, is producing nothing. Men who are not tilling the land they have as it ought to be tilled, are constantly mortgaging their future to buy more land and more equipment to work it. And such men are fast becoming the bogged and speculators. The West needs more of intensive cultivation, that is, better farming, rather than more acres brought under the plow.

Relief for Suffering Everywhere— Dr. Tolmie's statement of the suffering that comes from intestinal trouble has not tried Farnell's Vegetable Pills does not know how easily this formidable foe can be rebuffed. These pills will relieve where others fail. They are the result of long and painstaking research, and are confidently put forward as a sure corrector of disorders of the digestive organs, and as a safe and powerful remedy.

Prince Edward's Work

He Does His Work Well Because He Is a Highly Trained Worker

On the prince's part, it is a remarkable achievement to have carried out this mission in such a way as to create this ground of sympathy between himself and the people of the Commonwealth. Beyond question he has shown himself a man of the utmost usefulness. But we venture to think he has greater assets than the charm of his personality. He does his work well because he is a highly trained worker. From his boyhood he has been prepared, and has prepared himself for the work of expansion. With railways and other means there is no doubt as to the progress of the district and its people.

While the actual miles of the railway is sufficient to give the enterprise a position of first-class importance. At Peace River town the railway connects with 450 miles of navigable waterway on the Peace along the whole of this distance the river flows through a region of state and soil suitable for farming settlement. Already people are pushing in, and occupying desirable locations, depending on the river for present communication and expecting that settlement and development will ultimately bring railway facilities. The 450 mile stretch of unbroken river navigation is only part of a great system of waterways extending to the Arctic coast through a region of possibilities of development of one kind or another—development that depends on the railway communication and the push and enterprise that accompany it—Edmonton Bulletin.

Minard's Liniment Relieves Distemper

Cool and Heartless

"Woman! You have ruined me with your extravagance. I am penniless! There is only one place for me now. Good-bye, I'm going!" "Where?" "To the river."

"Well, you'll be passing the post-office. Do you mind posting this letter?"

NOTHING LIKE IT FOR BRONCHITIS AND WEAK THROAT

Remarkable Cures in the Worst Cases Reported Daily

Cures Without Using Drugs

Doctors now advocate an entirely new method for treating bronchitis and irritable throat. Stomach disorder is no longer necessary. The most approved treatment consists of a binding vapor resembling the pure air of the Adirondacks. This soothing vapor is full of germ-destroying substance, and at the same time is a powerful healing agent. It is sent to the bronchial tubes and lungs through a skillfully devised inhaler that can be carried in the vest pocket. Simplicity itself is the keynote of this splendid treatment.

CATARHROZONE is the name of this wonderful invention that is daily curing chronic cases of weak throat, bronchitis and catarrh. Every breath through the inhaler is fresh, with soothing, healing substances that destroy all diseased conditions in the breathing organs. It can't fail to cure because it goes where the trouble really exists, and doesn't attempt to cure an illness in the head or throat by means of the catarrh tied up in the stomach. Catarrhrozone is a direct, breath-taking scientific cure.

There is no suffering from a grippy cold or any winter ill, that won't find cure in Catarrhrozone. It is constantly played by physicians, ministers, lawyers and public men throughout many foreign lands. Large store lasts two months and costs \$10.00 and is guaranteed. Send 50c. sample size 25c. all storekeepers and druggists. Write to the Catarrhrozone Co., Kingston, Canada.

The Peace River Country

Everything is Set For the Work of Expansion

The C. P. R. will operate the Dominion railway for the next five years. This is the essential link in connection with the arrangements recently entered into between the McArthur Company and the provincial government, and the C.P.R. on the other. Four hundred and fifty miles of railway is directly involved. The total length of line practically equal to that from Montreal, Que., to London, Ont., from Winnipeg to St. Paul, or from St. Paul to Chicago, and 60 miles farther than from Edmonton to Coquiton on the United States boundary by way of Calgary and Lethbridge. There is room for vast development in such a stretch of country; development which must in large measure follow the railway service.

The coming five years mean everything for the Peace River country. Conditions have become established. Population is settled. Everything is set for the work of expansion. With railways and other means there is no doubt as to the progress of the district and its people.

While the actual miles of the railway is sufficient to give the enterprise a position of first-class importance. At Peace River town the railway connects with 450 miles of navigable waterway on the Peace along the whole of this distance the river flows through a region of state and soil suitable for farming settlement. Already people are pushing in, and occupying desirable locations, depending on the river for present communication and expecting that settlement and development will ultimately bring railway facilities.

England's Arable Area Increased
Since 1915 there has been a steady increase in the arable area of England due to the government policy of encouraging the production of food-stuffs.

A record hay crop is expected this year, but the outlook for the fruit crop is poor. Of apples an average only 20 percent of the average is expected and the small-fruit crops are also below average.

Overdressed Youth: "Here is a hap'piness for you, my man, and pray tell me how you came to be so miserably poor."

Mendicant: "Ah, sir! I was like you, I had a good deal of money, but I lost it all in a bad speculation."

Half Section at \$130 Acre
A record price for land, twenty-five 160-acre sections in the Peace district is reported in the July 7th & 8th section for \$23,000, or a little better than \$130 an acre.

Make Life on The Farm Appealing

To Meet the Difficulty in Connection With Raising of Boys and Girls

Since the war a problem which has been worrying agriculturists all over the country is that of keeping the boy and girl on the farm. All the literature that I have seen on the subject shows quite plainly that the panorama has been discovered in connection with the exodus of the boys and girls from the farms. I think that few gentlemen will all agree that we can at least go a long way towards solving the problem by adopting better farm methods; by making the home more attractive; by keeping better livestock; by making more profit on the farm, which will make possible more comfortable conditions such as will be conducive to happiness and contentment; by making conditions tolerable for the farmer's wife; and generally by doing everything we can to make life on the farm appealing. In addition to this I think that good roads and cheap automobiles should play a very great part in helping to keep the young people on the farm, by rendering very valuable assistance to the farmer in different ways in connection with his work and by enabling him and his family to move around and mix with the neighbors, thus obtaining some social pleasure out of life—H. P. Towner in House of Commons, May 14, 1920.

Strength of Trees
Two Steel Cables Could Not Move Old Elm

Few people have any idea of the strength of trees. In Boston, Mass., recently, an old elm, more than three feet in diameter, had to be removed from the common. Several of its limbs had been struck off by lightning, and it was supposed to be in a dangerous condition. So one of the tree-removing devices used in France for tearing down buildings, etc., was brought into play. This is a machine that is worked by a couple of men moving a lever back and forth. A cable was fastened to the tree trunk, and it should have come up by the roots, all things being correct. Instead, it broke the neck of the tree—just one inch thick—and then, when two were wound around that old trunk, the tree shivered and broke them. The machine tractor gave it up as a bad job, and put several men on with axes to cut the roots.

SUMMER COMPLAINTS KILL LITTLE ONES

At the first sign of illness during the hot weather give the little ones Dr. Williams' Pink Pills or Tablets or Tablets. These little ones are very susceptible to summer complaints if given occasionally to the children. When they are given these troubles if they come on suddenly. Baby's Own Tablets should always be kept in every home where there are young children. There is no danger in giving them. The mother has the guarantee of a government physician and they are absolutely safe. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Williams' Medicine Co., Brockville, Ont.

A Good Record

Granting that we have had our off years we should remember that the average production of wheat per acre in Canada for the last ten years has been 19.25 bushels, while that of the United States has been only 14.72. And that in spite of the weather and other conditions which drought, hail, wind and frost have brought us.

"Playing the Game"

"Did you get anything?" whispered the burglar on guard, as his mate emerged from the window.

"No! I did! This dump belongs to a lawyer."

"Get that hard look!" said the first. "Then, as an afterthought: 'But did you lose anything?'"

Montreal, May 29th, '20.

In Agriculture Wealth of the Prairies Lies Our Future Greatness

Government returns credit Western Canada with 15,771,000 acres of wheat. All the rest of Canada has 1,485,000 acres. This is 17,256,000 acres. Wheat is bread and horses are the staff of civilization. It has been so throughout all recorded ages. So far as it can be seen it will be so throughout all the ages to come. Being the staff of life wheat is wealth. The value of gold is measured by its power to purchase wheat. The nation that produces the most wheat has the greatest wealth.

Wealth is power. Egypt and Assyria were great and powerful because of their assured production of wheat. Their wealth in Assyria was enabled them to establish the earliest recorded civilizations with an education and culture as finished as that of today. It was their wealth in wheat that enabled them to raise and equip armies and to extend their authority far beyond their own borders. The Egyptians were able to build the pyramids and fringe the Nile valley with temples in stone that are the wonder of the modern world. Because there was always "corn (wheat) in Egypt." The architectural ambitions and the power of the Assyrians were even greater than those of the Egyptians. But building of brick instead of stone, the record does not limit the power of wheat in Egypt. The tower of Babel was built out of the wealth of wheat on the plains of Mesopotamia. The pyramids of the wealth of wheat of the Nile valley. Its wealth of wheat, more than any other factor, is what has enabled the United States to achieve the position as a nation and as a world power that it holds today.

The blanket of black soil that covers the Canadian prairies from the Red River to the Rocky Mountains is wealth, and civilization, and power because it produces wheat and because its nature is such that it can continue to produce wheat for generations. In that black soil lies the future of Canada. It is the foundation of her national greatness, present and future.

But possibilities are not results, and only results count. Egypt and Assyria which alternately dominated the ancient world, have been under the heel of oppression for centuries. Russia, with its vast area of wheat producing black soil that the Canadian West, but her people are poverty stricken and starving. The possibility of wheat production is not civilization. There must be actual production, the result of the application of industry, and favorable conditions for production in order to achieve the position as a nation and as a world power that it holds today.

It is by human effort properly applied and directed in causing the earth to produce wheat that wealth and power are created and civilization is built up. The production of wheat is not an end. It is a means to an end. And the end is the development of the human race. It is the duty of the people who produce the wheat, and of their fellow citizens, whose co-operation is essential to the progress and success of the citizen whatever may be the line of his life work.

Electricity for The Farm Home

Concerted Action by Municipalities
Would Provide for Wide
Distribution

The necessity for a more adequate supply of electric energy to the small communities, particularly in the prairie provinces, has often been pointed out by the commission of conservation. Concerted action would bring this most needed utility to every town, village and practically every farm within reach.

The municipalities of the United States is very aggressive in this respect. Central stations are building lines as rapidly as possible, and are planning more for the immediate future. Regarding the construction and cost of these electrical works states:

"In general the construction is of two sorts for two very different purposes. The first consists mainly of 30,000-volt lines, separating miles of interconnecting generating stations and taking on new towns or industries. The second consists of 6,000-volt and 4,600 volt lines, designed to serve groups of farmers and small villages. "Where it is difficult to generalize on prices when the meter market goes as unstable, it may be said that farm lines cost at present from \$600 to \$1,000 per mile. The 30,000-volt, 65,000-volt lines cost from \$3,500 to \$4,500 a mile. Moreover, the cost factor seems at present to be one of the most important in the maintenance of power lines."

How long this era of construction may last. Certainly the demand for power is increasing and it is some time to come, especially in the farm-line extensions.—L. G. Donis.

Disgraced Officer Wins Back Honors

An Armistice Day Disturbance Wiped Out by Russian

By the approval of the King, the London Gazette stated recently, the Military Cross and bar, which were conferred on Temporary Second Lieutenant Adam Thompson Stewart, Machine Gun Corps, will now be restored to him in recognition of distinguished services subsequently rendered in the field.

This Scottish officer, who is now demobilized, as a sergeant in the 5th Battalion (Central Postal Directory) France early in November, 1914. He was wounded in February, 1915, and later returned to France as sergeant in the 5th Battalion (Central Postal Directory) France. For his bravery in holding a position at Guiney, in September, 1916, he was awarded the Military Cross. He later gained a commission and a bar to his decoration in the 5th Battalion (Central Postal Directory) France.

For his taking part in a disturbance on the day the armistice was signed, he was cashiered, losing his commission and commission. As a corporal sent in the 4th Royal Fusiliers he went to North Russia and was there recommended for the Victoria Cross. On account of his gallantry. On the first occasion he recommended a Bulgarian soldier, who gained instant information, and was later forced to make a successful attack.

With two companies he captured twenty-two trenches guarding a strategic point with a machine gun. His first exploit was to penetrate nearly eight miles into Bolshevik territory and the loss of a bridge, thus blocking the only route by which the enemy could send reinforcements.

Abbey Never Completed

Greater Tower Never Raised Higher Than Present Level of Roof

Anybody who studies Westminster Abbey will notice that it has never been completed. In addition to the fact that the tower of the abbey was never raised higher than the level of the roof and the Cathedral and offered to provide the entire cost of building this tower as the roof and the Cathedral were completed. The Cathedral Clergy were delighted. Then the man made one stipulation. The tower must be called by his name. The dean refused the offer, and rightly. Had the tower been raised the condition the tower would have been named after him.

Each of the several tribes of the Congo has its own dialect.

Egg-Laying Contest Over the Dominion

Canadian and Provincial Contests to
Open Nov. 1, 1920 and Run
For 52 Weeks

The Dominion Experimental Farm will conduct a second series of Egg-Laying Contest, beginning Nov. 1st, to continue for 52 consecutive weeks. The names and locations of the contests will be as follows:

Canadian Contest—Canadian Egg-Laying Contest, Experimental Farm, Ottawa, Ont.

Provincial Contests—Prince Edward Island Egg-Laying Contest, Experimental Station, Charlottetown, P. E. I.

Nova Scotia Federal Egg-Laying Contest, Experimental Farm, Nappan, N. S.

New Brunswick Egg-Laying Contest, Experimental Station, Fredericton, N. B.

Quebec Egg-Laying Contest, Experimental Station, Cap Rouge, Que.

Ontario Egg-Laying Contest, Experimental Farm, Ottawa, Ont.

Manitoba Egg-Laying Contest, Experimental Farm, Brandon, Man.

Saskatchewan Egg-Laying Contest, Experimental Farm, Indian Head, Sask.

Alberta Egg-Laying Contest, Experimental Station, Lethbridge, Alta.

British Columbia Egg-Laying Contest, Experimental Farm, Agassiz, B. C.

Note: The "Canadian" is open to entries from anywhere, the "Provincial" is confined to entries within the province in which it is situated.

Fee: The entry fee for the Canadian Egg-Laying Contest at Ottawa is \$1.00. The fee for the provincial contests is \$.50. One-fifth of the entry fee must accompany the application which must be received before Oct. 15. The balance must be paid by Sept. 30. Should the entry not be received, the first payment will be refunded, but should the entry be received, the entry fee will not be refunded by Oct. 10, the application will be cancelled and the first payment forfeited. Failure to forward the pen when instructed automatically forfeits the fee and the application is cancelled. All eggs, or money under \$10, must be made payable at par in Ottawa and made out to the "Accountant, for Egg-Laying Contests."

Entries: Entry forms and Rules and regulations will be supplied on application to the Dominion Poultry Magazine, or to the nearest Poultry Farm, Ottawa, or the superintendent of the experimental farm upon which contest you wish to enter is conducted. The names of contest showmen. Entries must be made direct to the contest you wish to enter along with the first payment before August 15th.

1. Number—Each entry or pen must consist of ten birds of a standard variety and each bird must be of typical of the breed and free from standard disqualifications.

2. Substitution—Each contestant must be allowed to keep one or ten birds up to strength throughout the contest. In the Canadian Contest, the names of contest showmen. Entries must be made direct to the contest you wish to enter along with the first payment before August 15th.

3. Acceptance of entries—Each contestant must be allowed to keep one or ten birds up to strength throughout the contest. In the Canadian Contest, the names of contest showmen. Entries must be made direct to the contest you wish to enter along with the first payment before August 15th.

4. Inspection—Fees for which application has been received will be inspected between August 15, and September 1st. If the birds are among domestic flocks or in unsanitary conditions will be rejected, and those that do not promise to be mature or those that may mature too slowly may be rejected.

5. Declaration of health—Each entry or pen must be accompanied by a declaration stating that the birds or laid come from a flock that has been free from chicken-pox or tuberculosis for at least three months previous to the contest. The birds must be handled by the owner with his own hands before shipment, but will be rebanded with sealed contest bands when arrived at the contest and the original bands removed. The contest numbers corresponding to owners names will be supplied.

6. Delivery—The birds must be delivered at the contest when notified by the management, express prepaid. This will be from the address of the end of October. Address the

Prince of Wales Is Stocking Ranch to Benefit the West

The Prince of Wales purchased the Bodolai ranch, and is now stocking it up with some of the best breeds of cattle, sheep and horses, with the principal reason in his mind being to benefit the stockman of Western Canada, is not generally known. Indeed, it is known at all, but this announcement has been made by Professor W. L. Carlyle to a representative of the Calgary Herald. During the conversation Mr. Carlyle stated that the string of thoroughbreds that are now stabled at Victoria Park are owned jointly by His Royal Highness and George Lane. The string will be conducted under his own, though they will be raised as individuals by their respective owners.

"These horses, in fact," all the "journey across the continent," of course there will be no racing done with them until next season, as we must first acclimatize them. I am going to manage the stable, and will, in fact, have the care of the stock on the Prince's ranch and the horses will be shipped to the West.

The Prince is shipping over here 26 short-horns, from the very best of the breed, and 75 Shorthorn sheep. Most of the cattle are old-handers. It is the Prince's idea to bring this high grade of stock to the West with the intention of helping out the stockmen of the West. They have all been raised on the Prince's farm, Breckinridge, and bred and bred, where they are not so much needed, he conceived the idea of having the ranch in Alberta, and giving the Western stockman a chance to get into good stock. If

shipping cattle plainly with the advertisement, the contest as given, the announcement, and on Oct. 1st, put your own address which will be the same as the address under which the contest was made.

8. Rejection—the management reserves the right to refuse any entries, to reject and return, or to destroy birds suffering from contagious or infectious disease, or are in any way unsuitable for the contest. Production records will be made, and will be included in these shipments. As the mating of the pens is optional, it will be noted that the contest is to be held every year.

9. Final Decision—in all cases the decision of the management shall be final.

10. Sale or Transfer—No relinquishing of sale or transfer of birds during the contest will be made nor shall any entry be withdrawn during the contest, except for reasons stated should the birds entering for the contest.

11. Record of Performance—all birds in the contests not otherwise disqualified and whose eggs average 24 or more in the contest that in 52 consecutive weeks lays 150 eggs, will receive certificate of Record of Performance. All birds that lay 225 eggs will receive certificate of Advanced Record of Performance. All birds that lay 250 eggs will receive certificate of Record of Performance.

12. Responsibility—While the contest is in progress, every bird entering the contest must be managed nor any official of the contest will be held responsible should the birds enter for the contest.

13. Final Decision—in all cases the decision of the management shall be final.

14. Final Decision—in all cases the decision of the management shall be final.

15. Final Decision—in all cases the decision of the management shall be final.

16. Final Decision—in all cases the decision of the management shall be final.

17. Final Decision—in all cases the decision of the management shall be final.

18. Final Decision—in all cases the decision of the management shall be final.

19. Final Decision—in all cases the decision of the management shall be final.

20. Final Decision—in all cases the decision of the management shall be final.

21. Final Decision—in all cases the decision of the management shall be final.

22. Final Decision—in all cases the decision of the management shall be final.

23. Final Decision—in all cases the decision of the management shall be final.

24. Final Decision—in all cases the decision of the management shall be final.

they are not sold then they will be bred and raised and be marketed in the ordinary way.

The cattle and sheep belonging to the Prince of Wales at present in Western Canada are of all breeds, and some difficulty about them in England, owing to the foot and mouth disease regulations, and they had, therefore, to be sent to Scotland, in a short while the herd will be on its way out to Alberta.

Lord Minto's herd consists of 13 Shorthorns and 29 Oxford sheep, and these will be arriving at his lordship's ranch in a short time.

The price is very good of his Dartmoor ponies. This animal is the oldest known type of horse in the old country, their forebears having supposed to have been brought over in the early days of England's history.

By the miners of tin in Cornwall, the price of all these ponies is of a size between the Shetland and the ordinary horse, and they will be raised here, and used principally for children's driving ponies. Professor Carlyle expressed the opinion that they would probably grow to be a bigger type than in the old country.

Though the price is not expected to be another visit to Canada next year, his manager and financial secretary, Walter Peacock, C.V.O., is coming to Alberta in September. He will travel the length of all the United States and visit the state fair at Iowa, and will be met there by the Prince of Wales. It is his intention to judge the Portland stock show. Mr. Peacock will then come through to Alberta and spend two or three weeks, studying the conditions in the country.

Should the birds be made, from another visit to Canada next year, his manager and financial secretary, Walter Peacock, C.V.O., is coming to Alberta in September. He will travel the length of all the United States and visit the state fair at Iowa, and will be met there by the Prince of Wales. It is his intention to judge the Portland stock show. Government Co- Operation with Farmers

To Assist in Establishment of Herds
Throughout the Province

The Department of Agriculture of the province of Saskatchewan is carrying out an extensive program of assistance to the farmer, the work of the livestock branch in the past year being particularly efficacious.

Some of the most beneficial work of the branch has been in the purchase and distribution of purebred sires and grade females. The department purchases suitable sires for sale and sells them to farmers who require the necessity for their use on credit terms. A new record in this work was created in 1919. About fifty per cent of the purchased animals sold on credit terms were Shorthorns, twenty-five per cent Herefords, fifteen per cent Angus and the balance Holsteins, Ayrshires and Red Polands.

The grade females were sold to farmers on the same terms. The department saw a greater number handled by the branch than any previous year since the system was adopted. In 1913 a total of 345 grade females were placed, and in 1918, 3914.

To assist in the establishment of herd books throughout the province last year, the livestock branch placed 3,491 grade ewes on provincial farms. Much work was also done in the distribution of rams, carcases being brought from Eastern Canada, and importations made from Great Britain.

A valuable work was done by the provincial veterinarian in travelling about the province assisting the veterinary surgeons in the various troubles which arose. Much effort was put into laboratory and bacteriological work and a vaccine evolved which was distributed extensively to farmers.

It is the purpose of the Hon. C. M. Hamilton, the minister of agriculture, to fully extend the work of this branch, and he is convinced that the substantial prosperity of Saskatchewan depends upon the variety of assets upon the farms of the province. Mr. Hamilton is himself a practical farmer, having taken up a homestead in Southern Saskatchewan nineteen years ago. He has made several additions to the place since the intervening years, and is now farming on an extensive scale.

An Improved Plough

We are promised a change in the despoiled pen, according to Popular Mechanics Magazine. A horticulturalist has been working to replace the big hard stone to which we are accustomed by a tender, unprotected seed. Those produced so far have the appearance and favor of an almond kernel, making the whole fruit deliciously edible.

Blinder Twine Should Be Treated

Solution of Bluestone Will Prevent
Damage by Grass-
Hoppers

E. H. Strickland, of the entomological laboratory at Lethbridge, in the course of an interview with the Calgary Herald, stated that during the past few years grasshoppers and crickets have caused considerable injury by cutting blinder twine while grazing in the stacks. One of the twine-twisted twine suffered the most, and while it had been stated that twine treated for field mice would not be touched by hoppers, he had not an opportunity of testing this out. This year, he said, they anticipated excessive damage to twine since not only the grasshoppers, but also the large regular crickets, crickets, were far more numerous than usual.

It had been found after repeated experiments by another official in Manitoba that blinder twine, protected by soaking the twine for half an hour in a solution of bluestone, was immune from the ravages of the pest. Mr. Strickland stated that the twine could be used on the blinder twine, but before it was used for this so he be dry before using, as this prevented marring.

The Matter With Canada

A Few of the Causes Responsible for
Prevailing Abnormal
Conditions

What's the matter with Canada? these days?

Too many diamonds, not enough alarm clocks.

Too many silk shirts, not enough blue flannel ones.

Too many pointed-toe shoes and not enough square-toed ones.

Too many green suits and not enough overalls.

Too much double-breasted and not enough single-breasted suits.

Too many x-ray-unprotected liniments and not enough cures.

Too many customers and not enough producers.

Too much envy of the results of hard work and too little desire to be honest.

Too many desiring short cuts to wealth and too few willing to pay the price.

Too much of the spirit of "get while the getting is good" and not enough old-fashioned Christianity.

Too much discontent that vents itself in mere complaining and too little real effort to remedy conditions.

Too much class consciousness and too little sympathy for the lowly.

Too much desire to live by humanity—Scientific Temper.

Turkey's first regular army was organized in 1329 from Christian prisoners.

AUCTION SALE OF HORSES

Acting on instructions from Thomas Moore
I will sell absolutely without reserve the following valuable horses, at his barns in
CLARESHOLM, on

WED. SEPT. 15

Sale starts at 1 o'clock sharp.

80 head of Mares and Geldings, broken to harness
30 head of 2 and 3 year old Mares and Geldings, halter broken
3 Mares with colts at foot, about 9 years old
16 head of thoroughly broken Saddle Horses

This bunch of horses are bred from the best Shire and Percheron blood in Southern Alberta.

Any parties wishing to look this bunch of horses over before the date of sale can do so, as the horses are within 7 miles of Claresholm.

TERMS—Credit will be given on approved lien notes dated December 1st, 1920, bearing interest at 7 per cent; a discount of 5 per cent will be given for cash.

Born, to Mr. and Mrs. G. W. Cummins, a daughter.

Born, August 5th to Mr. and Mrs. W. K. Bothwell, a daughter.
Mrs. M. Kassel, of Shelby, Montana, visited, with Mr. and Mrs. C. J. Braren.

"The Right to Happiness" coming to the Rex Theater on September 24 and 25.

Mrs. J. A. Harrison and daughter Emmalina, were visitors in Calgary last Saturday.

Morley Tillotson returned on Saturday last from Calgary where he spent the summer.

"The Right to Happiness" coming to the Rex Theater on September 24 and 25.

Misses Emmalina and Laura Harrison will spend the week end at High River, returning home Monday.

Miss K. Funk's health is much improved after spending three and a half months in the Okanagan valley.

"The Right to Happiness" coming to the Rex Theater on September 24 and 25.

A. Ramage and wife, of Vancouver, came last week to spend a few weeks in this district. A. Ramage is a nephew of D. H. Ramage.

Dressed up comedy, the kind that keeps you chuckling all the way home, is the Lyons and Moran brand of humor in "Everything But the Truth," Rex Theater, Friday and Saturday, September 10 and 11.

On Wednesday, September 15, Thomas Moore is selling a big bunch of extra good horses by public auction, at his barns in Claresholm. See full page ad in this paper for particulars.—Albert E. Strange, Auctioneer.

Last Sunday morning brought the first frost of the fall heavy enough to damage tender vegetation. Potatoes, beans, tomatoes and the like were nipped in some gardens, while in other gardens they were not touched. In this district the frost was not heavy enough to damage grain in the least.

He was a misfit earl, but a perfect lover—and scrapper. Anyhow, you can't expect a man fresh from the open plains of the great west to act like a Chesterfield when he finds a title thrust upon him. But you do expect a red-blooded westerner to be a perfect lover and a bear-cat of a scrapper. And Louis Benetton in "A Misfit Earl" certainly runs true to form. Don't miss this new Benetton glow-in-the-dark. Five reels of rough-riding romance and whirlwind fun. At the Rex next Monday and Tuesday.

Imprisoned all night with a strange man in a deserted farm house. No one would believe it. So she told her husband "Everything But the Truth." Its funny. Next Friday and Saturday at the Rex.

An Interesting Find

Skeleton Two Thousand Years Old

Discovered

A skeleton, buried at least 2000 B.C., probably nearly 3000 B.C., has been unearthed near Peterborough, England, by a local antiquary. The body, which may be of the bronze age, was buried in a crouching position, with the head to the north and feet to the east, while the hands were pressed against the chin, the right hand being underneath the right cheek.

A peculiar circumstance is that the burial was some five feet deep and had been made at the bottom of a ditch, with a circular entrenchment. No relics were found with the skeleton, which is that of a female, 25 to 30 years of age.

As a vernacular there is nothing so potent as Mother Graves' Worm Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

The weekly trade report of the Canadian Credit Men's Association gives several interesting points. One is that many lines of goods are now coming forward from factories more freely. Another is, that prices as a whole are remaining about the only exception being in boots.

Youth
and Age

THERE is no time in woman's life that she cannot benefit by the use of Dr. Chase's Nerve Food in order to keep up the supply of pure, rich blood and to ensure a healthful condition of the nervous system.

Headaches, neuritis, sleeplessness, nervous upset, irritability, tired, worn-out feelings, poor digestion when the vigor and energy of the nerves are restored by the use of this great food cure.

Write a letter to Dr. Chase, Ltd., Toronto.

Dr. Chase's Nerve Food

Is the Price of
Lumber Going Down?

Read the Following Facts and You
Can Then Judge For
Yourself

A fear of paying too much for lumber and the hope of an immediate or near future decline in the price of building material has caused many to hesitate building. That these fears are groundless and that the alternative of a higher or lower price is more likely to be pointed out in detail in the following paragraphs.

This fear causes hesitation and by hesitating people are gradually adding to the congestion of the lumber situation which is already serious.

A thorough investigation of the lumber situation brings out some startling facts relative to the cost of production.

Lumber is made from logs. Logs must be cut. Cutting takes labor, and labor is high. There is the A. and the C. and the B. of the whole situation.

Logging camps are operating eight hours daily in place of ten hours, as formerly, yet paying the same wages. Sawmills are operating 30 hours weekly in place of 60 hours. Wages increased 20 percent over and above the time changes.

Railway freight rates increased 25 percent, and lumber requires long haul.

Wire rope, logging machinery, the camp supplies have increased up to 300 percent.

Mill supplies and equipment have increased from 100 percent to 300 percent. Tonnage rates increased 100 percent.

Government royalties increased 50 percent.

Fares of loggers going and coming from camps increased.

The fringes of the forest is being cut. The lumber must be hauled further and from deeper recesses, not as accessible as formerly.

The cost of production of the finished article has jumped enormously since 1914-15. These increases and their ever climbing bill precludes any drop in the cost of lumber. It rather makes a most desirable purchase at the present price, and an actual investment when put into a house.

The question of further increase of freight rates, supplies, wages, etc., enter into and make uncertain the prices of lumber.

The shortage at the present time is caused to a certain extent by the hope that the cost of building would be a descent. The above figures are convincing evidence of the futility of waiting. Act now! Build now!

Minard's Liniment Relieves Colds etc.

New Age of Happiness

Sweet Seventeen Not in It With the Woman of Thirty.

Five

The women are happiest and at their best from the age of thirty-five on wards, according to Dr. Josiah Oldfield, who challenges the popular idea that the young woman is queen of the earth and that sweet seventeen has the discovery of the new age of happiness was communicated by Dr. Oldfield to an interested gathering of medical authorities. It is based not on mere theory but on the comparative records of men and women suicides after the age of thirty-five.

Life undoubtedly becomes more pleasant and attractive to women after they have reached this age," said Dr. Oldfield. More young women commit suicide before the age of fifteen and thirty-five than young men but after thirty-five it attained the position is evenly reversed. The majority of suicides are largely in the majority.

"Why are women so much happier after thirty-five? For one reason they have passed the ideal of childhood and reached disillusionment. They have arrived at a stage when family life has passed the ideal of youth. They are able to give much to the acquisition of beauty, which in their earlier years went to the pursuit of pleasure. My own belief is that not only should every woman be beautiful, but she can be so if she gives her mind to it."

Italy has laws penalizing education in advertising theatres or circuses.

Put it in for Lane Balm—A brisk rub with Dr. Thomas' Electric Oil will cure lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the balms sink in the pain comes out and there are ample reasons for saying that its touch is magical, as it is.

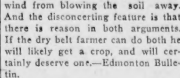

W. N. U. 1328

The Miracle Worker

What is the Unhappy Farmer to Do
With the Double-Jointed
Advice

After spending ten years teaching the dry belt farmer that he should work the surface soil into a fine mulch to retain the moisture, the agricultural experts are now starting to tell him that he must have the surface covered with straw or mulch to keep the wind from blowing the soil away. And the disconcerting feature is that there is reason in both arguments.

If the dry belt farmer can both he will likely get a crop, and will certainly deserve one.—Edmonton Bulletin.

A large number of the suits have been re-exported to India and South Africa, but some merchants in London are of the opinion that in view of the present high prices of clothing there are wide possibilities in paper suits, especially in industrial districts. If they could be cut more in the English style and to English tastes.

The agents who are dealing in these suits are of the opinion that by the present rate of exchange it is possible for a man to purchase a suit of a new style for less than a period of twelve months the entire cost would be less than the price of one single English suit.

Rainfall in Saskatchewan

Grain Production for Four Years is Shown by Report

A comparative statement showing the average yield and total production of wheat, oats, barley, and flax for the past four years in each of the nine crop districts into which the province is divided, is one of the features contained in the 1919 annual report of the statistics branch of the Saskatchewan department of agriculture, which has just been published.

Under the heading of precipitation a couple of new and interesting features have been introduced in the report. One of these is a diagram showing the precipitation in the different wheat crops during the past four years and also during the growing season, April to September, inclusive. Tables are also included showing the average precipitation in each crop district for every month of the past four years.

Additional tables are incorporated in the report showing the total rainfall in each crop district and the average for the past six years, and the total rainfall during the growing season and the average over the past six years in each crop district.

Ashma Cannot Last when the greatest of all Asthma specifics is used.

Dr. J. D. Kellogg's Asthma Remedy assuredly deserves this exalted title. It has countless cures in its power, and it is the only remedy that has failed to fail. It brings relief to the patient to a condition of blessed relief. Surely suffering from asthma, when a remedy like this is so easily secured.

Americans Serving in Canadian Forces Will Lose Their Citizenship

Men who, when citizens of Massachusetts, were in the Canadian and other allied forces prior to the entry of the United States into the war have lost their citizenship and cannot vote, according to an opinion handed down by Attorney-General J. Western Aldrich in the request of Secretary Lansing for the revocation of their citizenship by taking the oath of allegiance.

No one need endure the agony of corns with Holloway's Corn Cure at hand to remove them.

Important

The Girl at the Window.—Yes, naïve, this is the information bureau. What do you wish to know?

The Woman Outside.—I'd like to know how much you paid for that gorgeous crepe waist you're wearing.—Boston Globe.

Waken to Music is Latest Device

An ingenious combination of clock and phonograph, has been perfected so that the shrill noise of the alarm bell will no longer be heard at seven o'clock or thereabouts in the morning. Instead, the talking timepiece will sing out, "Time to get up," and will keep on singing it until it is suppressed.

Frequent Headaches

A Sign That the Blood is Watery and Impure

People with thin blood are much more subject to headaches than those of blooded persons and the forms of headache that afflict garters with thin blood are almost always accompanied by headaches, together with dizziness, ringing in the ears, and a feeling of weakness.

Whenever you have constant or recurring headaches and a feeling of weakness, they show that the blood is impure and watery. The blood is directed toward building up your blood. A fair treatment with Dr. Williams' Pink Pills will do this effectively, and the rich red blood made by these pills will restore the blood to its normal condition.

"More disturbances to the health caused by the blood than most people have any idea of. When your blood is impoverished, the nerves suffer from lack of nourishment, and you may be troubled with insomnia, nervous, neuritis, rheumatism. Males subject to strain are undergirded by the blood, and suffer from rheumatism or lumbago. If your blood is thin and watery, in the morning you will find your head aching, try building up the blood with Dr. Williams' Pink Pills, and as the blood is restored to its normal condition, the ailments will disappear. There are more people who owe their present state of good health to Dr. Williams' Pink Pills than to any other medicine, and most of them do not know it."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 25c a box, or by express for \$3.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Paper Suits

Possible for a Man to Purchase A
New Suit Once A
Week

Large quantities of paper suits made in Germany are being displayed by a British firm of importers at this shop in London.

These ready-made suits are cut to English styles and are paid to be of the very best class of paper texture, and are being sold from \$8 to \$40 a suit. Last month 40,000 of these suits were imported by a firm of transport agents from Germany via Holland, and another consignment of 5,000 is on the way. Further consignments are expected to arrive at frequent intervals.

A large number of the suits have been re-exported to India and South Africa, but some merchants in London are of the opinion that in view of the present high prices of clothing there are wide possibilities in paper suits, especially in industrial districts. If they could be cut more in the English style and to English tastes.

The agents who are dealing in these suits are of the opinion that by the present rate of exchange it is possible for a man to purchase a suit of a new style for less than a period of twelve months the entire cost would be less than the price of one single English suit.

Rainfall in Saskatchewan

Grain Production for Four Years is Shown by Report

A comparative statement showing the average yield and total production of wheat, oats, barley, and flax for the past four years in each of the nine crop districts into which the province is divided, is one of the features contained in the 1919 annual report of the statistics branch of the Saskatchewan department of agriculture, which has just been published.

Under the heading of precipitation a couple of new and interesting features have been introduced in the report. One of these is a diagram showing the precipitation in the different wheat crops during the past four years and also during the growing season, April to September, inclusive. Tables are also included showing the average precipitation in each crop district for every month of the past four years.

Additional tables are incorporated in the report showing the total rainfall in each crop district and the average for the past six years, and the total rainfall during the growing season and the average over the past six years in each crop district.

Ashma Cannot Last when the greatest of all Asthma specifics is used.

Dr. J. D. Kellogg's Asthma Remedy assuredly deserves this exalted title. It has countless cures in its power, and it is the only remedy that has failed to fail. It brings relief to the patient to a condition of blessed relief. Surely suffering from asthma, when a remedy like this is so easily secured.

Prairie Strawberries

Flavor Much Better Than That of the
Coast Berries

Angus McDowell, of Ray, brought to the Bulletin office on Thursday a box of strawberries grown in his garden. All the berries were large, but one of them measured four and a half inches across. The berries are of the ever-bearing variety. Mr. McDowell sent out 75 plants last season, in ground that had been fallowed the year before. They were placed in two rows. The rows were two feet apart, and the plants were two feet apart in the rows. They grew well last season and some blossoms came but they were not allowed to produce fruit. No mulch was placed over the plants last fall, but they entered a new era. They had no fertilizer this season but have been carefully weeded and hoed. They are fruiting abundantly, about a box of berries to a plant. The flavor is excellent, being much better than that of the coast berries as they come on the market here.—Edmonton Bulletin.

Child's Best Laxative

Accept "California" Syrup of Figs only—look for the name California on the packages, then you are sure your child is having the best and most reliable laxative for the little stomachs, liver and bowels. Children love to take it. Full directions on each bottle. You must say "California."

Immigration Figures

Canada is Getting 18,000 Immigrants Each Month

British immigration to Canada so far this season is about double that coming in from the United States. Of an average influx of about 18,000 a month 12,000 are coming from the United Kingdom and 6,000 from the United States.

The newcomers from the old country are mostly English. Out of an arrival of 18,000 in the last month tabulated, over 8,000 were English; 10,000 Scotch; less than 1,000 Irish and 150 Welsh.

The new immigration restrictions requiring careful selection are rejecting about 1,800 a month, while about 10 per cent are deported for criminality or other disqualifying conditions.

Local News

"The Right to Happiness" coming to the Rex Theater on September 24 and 25.

The auctioneer and clerk are now ready to arrange dates for auction sales this fall. Don't put off too long; get your date arranged early.

We wonder who is responsible for the Star Line road. There are few roads that cut heat in for roughness and yet there is no road that has more traffic and it should be kept in good condition.

The warm summer evenings are now over, so the Rex Theater will be open every night. Manager Edmund informs us that the best attractions that more cities have been secured for the season.

It is reported on what appears to be good authority that the Railway Commission has ordered that the former train service of four passenger trains each day on this branch of the C. P. R. shall be resumed not later than October 1st.

The Annual School Fair is arranged for September 14th. Entrance is free, but before the fair the acting secretary is Miss M. Morrow. Entries can be made at the C. P. R. office. Special prizes in the form of silver cups are being asked. See list in this paper or ask the secretary for particulars.

Mr. and Mrs. Stebbins, Harold and W. G. Moffatt returned from their trip on Friday morning. They visited Montana, Idaho, Wyoming and Colorado, crossed the Rocky mountains twice, went through Yellowstone Park, and saw some of the most interesting scenery on the American continent.

A E. Runions had a narrow escape from losing both feet, if nothing worse, in an accident on Tuesday. While cutting grain he stopped the horses to adjust the canvas and while standing in front of the binder making the adjustment the horses started. Both legs were cut, one of them badly, but fortunately the horses obeyed the command to stop, before more serious injury was inflicted.

During July and August union services were held in the Presbyterian and Methodist churches. Now that the holiday season is over the regular order of things will obtain once more, the pastors, Revs. Mitchell and Locke, preaching in their respective churches. It is hoped that the attendance next Sunday at both churches will be inspiringly large. "And he Jesus came to Nazareth, where he had been brought up; and as his custom was, he went into the synagogue on the Sabbath day."

He had a wild and woolly western way about him and when he breezed into Dunham Castle and announced that he was Lord Jim, there was nobody who cared to openly dispute his claim. Then he met the girl and all the love around the castle got a taste of rough-riding romance and scrapping, and there was one concluded duke who got more than his share of the latter. See Louis Heston, the smiling cowboy, in his latest Goldwyn-Bette wood, production, "A Misfit Earl," Rex, next Monday and Tuesday.

NOTICE

The Clareholm School of Agriculture will reopen on October 29th, 1920. A large attendance of students is expected during the coming term, and it is hoped that the people of Clareholm will open their homes to the boys and girls. Those who wish to take students either to room or to board are asked to communicate with the principal at an early date. Kindly state preference for boys or girls, also state whether rooms can be supplied with or without board, terms, etc.

J. C. Hooper, Principal.

**IMPORTANT NOTICE
TAX RECOVERY ACT**

To all parties whom it may concern:
Take notice that the provisions of the Tax Recovery Act are operative for the year 1920 within the bounds of every municipal, urban or rural, and every improvement District of the Province of Alberta.

The land will be advertised for sale, as soon after August 14th as possible, by the Municipal taxing authority, on the day and hour and at the place mentioned in the advertisement, will be bid for the taxes as in arrears up to and including December 31, 1919, together with the costs. Owners, mortgagees, encumbrances, and others interested should communicate with the municipal authority levying the tax. The taxes and costs may be paid up to the time of sale, and after the sale there is one year for the redemption of the land.

J. H. LAMB, Deputy Minister of Municipal Affairs.

Steady Dependable Service

IMPERIAL Polarine assures a motorist steady, dependable service from his car. It gives a career liability to every type of motor and every moving part. It keeps your motor running smoothly and quietly.

Imperial Polarine maintains, under all operating conditions, exactly the right body to seal in compression and reduce wear. It burns clean, Imperial Polarine establishes and maintains a power tight seal between piston and cylinder walls. Its body is proof against hot heats and the grinding friction of engine parts.

Look for the Imperial Polarine Chart of Recommendations when you buy oil. It shows which of the three grades described below is best suited to your car.

Six sizes—gallon and four-gallon—sealed cans, steel kegs, half-barrels and barrels. Buy by the barrel or half-barrel and save money. Sold by good dealers everywhere in Canada.

IMPERIAL POLARINE (Light medium body) IMPERIAL POLARINE HEAVY (Medium heavy body) IMPERIAL POLARINE A (Extra heavy body)
